

Tell Me About Your Art!

Dear First Grade Families:

Today we found and made
LINES IN BALANCE.

Looking: We found **vertical and horizontal lines** in textile art.

Talking: We identified vertical and horizontal lines. We talked about the **directional lines** in a variety of materials.

Making: We selected ribbon or string (textiles) and **measured it by comparing it** to the **mat board** surface we are gluing it to. Then we cut ribbon or string to fit edge to edge vertically and horizontally. We glued an equal number of horizontal and vertical lines in balance in our collage.

Art at Home

Together:

You could look for vertical and horizontal lines in woven materials found at home.

Questions to ask:

What color are the horizontal lines?

What color are the vertical lines?

What types of textures did the weaver select for the horizontal lines?

What types of textures did the weaver select for the vertical lines?

**Balancing and spacing horizontal and vertical lines
creates lines in balance in art.**
